**STORMCHASER TECHNOLOGIES ANNOUNCES THE RELEASE OF
STORMTRACKER V4.1 – NOW INCLUDES FUTURES**

Austin, TX – August 26, 2005 – Stormchaser Technologies, Inc. is pleased to announce that it has released Stormtracker V4.1 that, in addition to Equities, now includes support for Futures trading. Stormtracker V4.1 includes support for the following Futures symbols, E-mini, Nasdaq emini, 30 year bond. These symbols automatically roll over after expiration and use both the correct RealTick and Interactive Brokers symbols for real-time Algorithmic Scanning and Black Box Executions for Futures traders. In addition, now there is support to add more Futures and currency symbols. If traders are trading other Futures, Stormchaser will add support for those for free. Traders simply have to let Stormchaser know what they need, by sending an email to support@stormchasertech.com with the symbols they would like included. Note that you need to subscribe to the exchange that the Futures trade on, for both Realtick and Interactive Brokers, if you use the Black Box features. With V4.1, there is now a separate indicator for Equities profit/loss and Futures profit/loss.

Stormtracker V4.1 includes a real-time configurable advanced [Algorithmic Scanner](#) that can monitor thousands of symbols configured by the user with simple point and click operations (non-scripting language), or by using the predefined trading libraries that are included. With V4.1, there is a Futures trading system included in the library. The “[Black Box” Execution Platform](#) is integrated with the Scanner. Black Box Executions require the execution platform to be integrated seamlessly with the Scanner, a feature that V4.1 handles easily. Symbols generated by the Scanner are automatically sent to the executions platform, which makes the trades without intervention, hands free. Soon to be released is Stormtracker’s Backtesting platform. When using your existing trading systems, as well as, easily developing new trading systems, you will be able to test these trading strategies for profitability based on historical data through the [Backtesting Application](#). You can now download a **FREE 7-day trial** of Stormtracker V4.1 by visiting www.stormchasertech.com. For a limited time purchasers of the Stormtracker Scanner get the first 6 months for only \$40/month. Purchasers of the Scanner and Execution Platform pay only \$75/month for the first 6 months.

Robin Abraham, CEO said, "We are ahead of our development cycle in bringing out Stormtracker V4.1 for Futures traders." He continued, "Our development team did a great job and will remain on track to quickly develop and deploy additional quote feeds and execution platforms."
