**STORMCHASER TECHNOLOGIES ANNOUNCES THE RELEASE OF STORMTRACKER V4.0 ADVANCED ALGORITHMIC SCANNER & BLACK BOX EXECUTION PLATFORM**

**Austin, TX – August 8, 2005 – Stormchaser Technologies, Inc.** is pleased to announce that it has released Stormtracker V4.0 Scanner and its Black Box Execution Platform (hands free trading) for sale. Stormchaser Technologies is an automated Trading Systems Solutions Provider for Active Traders, Broker Dealers and Hedge Funds. These highly efficient and user friendly systems markedly enhance the accuracy, data handling and timely execution response capabilities, and hence significantly improve the efficiency and profitability of day trading. Stormtracker V4.0 includes a real-time configurable advanced [Algorithmic Scanner](#) that can monitor thousands of symbols configured by the user with simple point and click operations (non-scripting language) or using the predefined trading libraries that are included. The “[Black Box” Execution Platform](#) is integrated with the Scanner. Black Box Executions require that the execution platform be integrated seamlessly with the Scanner, a feature that V4.0 handles easily. Symbols generated by the Scanner are automatically sent to the executions platform, which makes the trades without intervention. Soon to be released is Stormtracker’s Back Testing platform. When using your existing trading systems, as well as, easily developing new trading systems, you will be able to test these trading strategies for profitability based on historical data through the [Back Testing Application](#). You can now download a **FREE 7-day trial** of Stormtracker V4.0 by visiting [www.stormchasertech.com](http://www.stormchasertech.com). For a limited time purchasers of the stormtracker scanner get the first 6 months for only \$40/month. Purchasers of the Scanner and Execution Platform pay only \$75/month for the first 6 months.

Robin Abraham, CEO & Founder said, "We are very pleased with how the Beta Test phase went and are very excited to be able to bring these tools to the market that will greatly enhance what Active Traders can do to maximize their profitability." He continued, "The Algorithmic Trading Market is growing quite rapidly, institutional Asset Managers currently push only 3% of their volume through Algorithmic Trading and this number will jump to 16% in 2006." Individual Active Traders now have an application for Algorithmic Trading. This Next Generation technology is available now for Active Traders for about \$200 a month.

Stormtracker V4.0’s “Open Systems” architecture is currently integrated with RealTick’s Quote Feed system and Interactive Brokers Trader Workstation. Other quotes feeds and Broker interfaces will soon become available.
